The film

A photograph taken from an airplane window, showing the white wing of the aircraft extending from the top right towards the left. Below the wing, a vast, hazy landscape of rolling mountains and valleys stretches out to the horizon. The sky is a clear, deep blue, and the overall atmosphere is one of high altitude and expansive scenery.

How the Clinical Librarian supports evidence based practice in a large UK teaching hospital

Dr Girendra Sadara, Consultant in Anaesthetics & Critical Care
Victoria Treadway, Clinical Librarian
Wirral University Teaching Hospital NHS Foundation Trust, UK

Who Are We

- A UK teaching hospital with a workforce of 5,500 delivering acute healthcare services to a population of 400,000
- Here we present our experiences of delivering the Clinical Librarian service in Anaesthetics & Critical Care

What is a Clinical Librarian?

- A qualified and specialised librarian
- Works in hospital alongside doctors, nurses & healthcare professionals
- Searches for evidence (guidelines, research studies, publications) to enhance patient care
- Provides training and expertise to enhance clinical decision making

Clinical Activity

- Clinical Librarian attends Intensive Care ward round
- Searches for best evidence on patient conditions and treatment at the bedside
- Demonstrates a positive impact on patient care

Research and Audit

- Clinical Librarian facilitates critical appraisal workshops
- Develops robust search strategies for database searches (e.g. Pubmed, Medline & Embase)
- Helps to close the gap between research and practice

A Clinical Librarian in an acute hospital setting enhances evidence based practice by providing the right information, in the right place, at the right time.
